

## MICRONEEDLING

---

The Eclipse MicroPen is used to create controlled micro-injuries to the skin in order to aid in the production of collagen and elastin.

Microneedling improves the appearance of fine lines, wrinkles, enlarged pores, stretch marks, acne scars, age spots, and hyper-pigmentation.

## MICRONEEDLING + PRP

---

Platelet Rich Plasma (PRP) is derived from your own blood and contains high concentrations of platelets and growth factors that help your skin tissue heal and develop new cells. When PRP is used with microneedling, it penetrates your skin through the tiny channels the microneedles create. PRP supercharges the benefits of microneedling.

## CHEMICAL PEEL

---

A chemical peel involves the application of a specialized solution to the skin, exfoliating the outermost layer to reveal smoother, clearer, and more youthful skin underneath. It is a non-invasive procedure suitable for addressing a variety of skin concerns, from fine lines and wrinkles to uneven skin tone and texture. This treatment helps combat acne and reduce the appearance of blemishes and scars.

## PHOTO-FACIAL

---

A photofacial, or "fotofacial," is a 30-minute procedure in which intense pulses of light are used to penetrate deep into the skin. IPLTM photo rejuvenation then causes collagen and blood vessels below the epidermis to constrict, reducing redness and age lines. Individuals with blotchy, sun-damaged, or discolored skin, or whose skin is affected by large pores, freckles, or wrinkles, may benefit from an IPLTM photofacial.
